Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13-16, drawn to a suction filter, classified in class 55, subclass 302.
- II. Claims 17-22, drawn to a turbocompressor, classified in class 415, subclass 169.1.
- III. Claims 23 and 24, drawn to a method for compact assembling of a turbocompressor via casting, classified in class 249, subclass 106.

2. The inventions are distinct, each from the other because:

Each group of claims is directed to a separate invention. It is noted that the groups maybe belong to a system. However, this is not sufficient to prevent a restriction requirement.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

(8.21.02) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

(8.21.03) Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, or vice versa, restriction for examination purposes as indicated is proper.

Art Unit: 1797

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
